

JONATHAN JIMENEZ

Left Winger / Forward · Westchester SC
USL League One · 24 years old · Two-footed

⚠ DRAFT — SINGLE MATCH · FGA PROVISIONAL 7.0–7.8

What this file is. A targeted single-match assessment of Jonathan Jimenez's two-goal brace for Westchester SC against Richmond Kickers on 16 September 2026. The Tier 3 evidence is a 13-event log covering the first-half brace — **mean quality 9.31/10, the highest single-match average in the ESN file series.** Tier 1 is populated across 2 USL seasons plus NYCFC academy/youth data.

Three blockers before client delivery.

1 — Single match only. The 9.31 average describes one first-half performance. Multi-match logging is required before any FGA rating is finalised.

2 — Position identity unclear. In the last 5 matches, Jimenez has played LB, AM, LW and LM. Five roles in five matches. The stated position (LW / W) does not match the deployment pattern. This must be resolved before the pairing set is finalised.

3 — COACH not scored. No second scout.

1 · SUBJECT PROFILE

ATTRIBUTE	DETAIL
Full name	Jonathan Jimenez
Position (declared)	Left Winger / Forward
Position (observed)	LB · AM · LW · LM — five roles in five matches
Club	Westchester SC
League	USL League One · LOG ~2.0
Previous	Hartford Athletic (USL Championship) · NYCFC Academy · NYCFC II
Age	24
Foot	Two-footed — scored with right (M1 38') and left (M1 43') in the same half
Selection reason	ESN Video Client
Evidence base	13 logged events · 1 match · Tier 1 full career data
Analyst	Jim Totime

Career pathway. NYCFC academy product (2022 MLS roster) → NYCFC II in the U.S. Open Cup (2024 — 5 apps, 4 goals) → Hartford Athletic in the USL Championship (2025) → Westchester SC in USL League One (2026). The trajectory is downward in league tier but upward in minutes and output. At 24, this is a player rebuilding from youth-prospect status into regular first-team football.

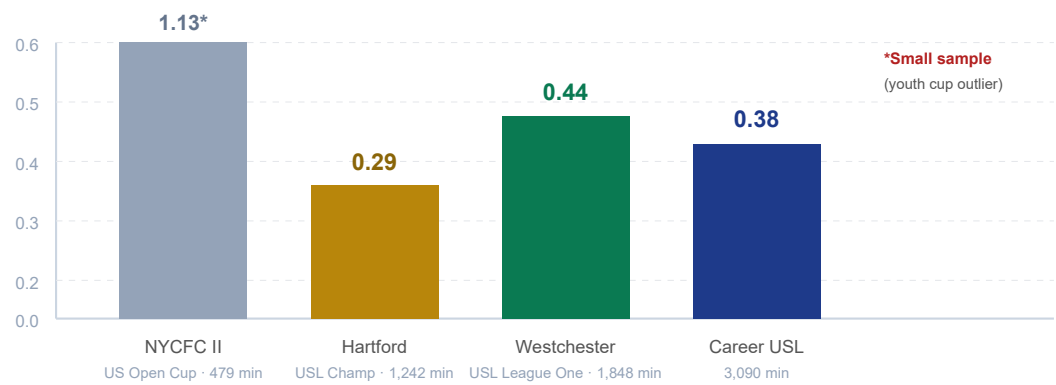

2026 SEASON — WESTCHESTER SC (USL LEAGUE ONE)

Metric	Value	Per 90	Assessment
Appearances	26	—	—
Starts	22	—	—
Minutes	1,848	20.5 90s	—
Goals	6	0.29	Solid
Assists	3	0.15	Moderate
G+A	9	0.44	Above average
Shots	31	1.51	Low
Shots on Target	15	0.73	Moderate
SoT %	48.4%	—	STRONG
G / SoT	0.40	—	Above average
Yellow cards	3	0.15	Controlled
Fouls committed	19	0.93	Low
Fouls drawn	48	2.34	ELITE — 2.5:1 RATIO
Offsides	6	0.29	Moderate
Crosses	8	0.39	Low
Interceptions	26	1.27	HIGH FOR A WINGER
Tackles won	23	1.12	HIGH FOR A WINGER
PPM (when playing)	1.15	—	—
On-Off differential	+0.60	Positive	Team performs better with him

CAREER — 2 SEASONS USL (2025 HARTFORD + 2026 WESTCHESTER)

Season	Club	League	Apps	Min	G	A	G+A/90
2025	Hartford Athletic	USL Championship	26	1,242	2	2	0.29
2026	Westchester SC	USL League One	26	1,848	6	3	0.44
2 seasons	2 clubs	2 leagues	52	3,090	8	5	0.38

CHART 1 · CAREER ARC — G+A PER 90 BY SEASON AND LEVEL

What the chart shows. The trajectory moved in the right direction across two USL seasons. The 2025 USL Championship output (0.29 G+A/90) dropped when he moved up a level. The 2026 USL League One output (0.44) is his best season-long figure — but it comes at the lower tier. The NYCFC II Open Cup figure (1.13 G+A/90, 4 goals in 479 minutes) is a youth-level outlier and should not be used as a comparison.

CHART 2 · 2026 SHOOTING FUNNEL — TWO-FOOTED FINISHING

SHOOTING FUNNEL (2026)

SoT% 48.4% — strong for a wide player
G/SoT 0.40 — above average

Two-footed: scored right foot (38') and left foot (43') in same match

FOUL RATIO

2.5 : 1

Elite ratio. He draws fouls at a rate comparable to the best wingers in the file series.

SYSTEM IMPACT

Positive on-off differential.

26 interceptions is unusually high for a winger — indicates either a defensive role or a utility deployment.

3 · TIER 3 — SINGLE-MATCH EVENT LOG 50% WEIGHT

MEAN QUALITY SCORE

9.31

Highest in ESN series

EVENTS LOGGED

13

Two-goal brace

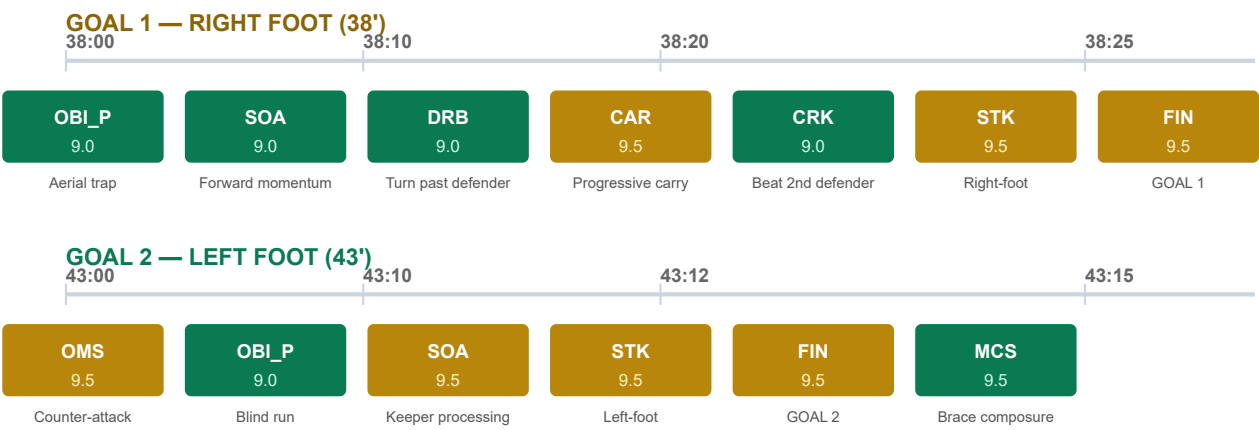

MATCHES LOGGED

1 / 5

Single-match focus

Match context. Westchester SC 5–0 Richmond Kickers · USL League One · 16 September 2026 · Home. Westchester dominated the first half. Jimenez scored a brace — a right-footed curler at 38' following a solo run down the left, and a left-footed slide under the keeper at 43' to finish a rapid counter-attack. Both goals are captured in the 13-event sequence.

CHART 3 · THE TWO-GOAL SEQUENCE — 38' AND 43'

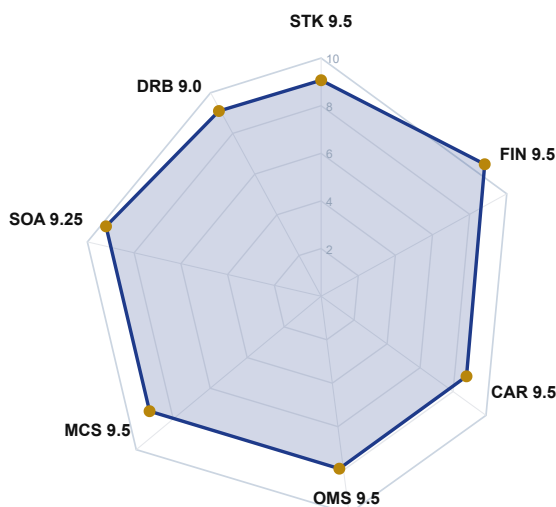

MEAN QUALITY: 9.31 / 10 — HIGHEST SINGLE-MATCH AVERAGE IN ESN SERIES

Two-footed brace in the same half. Right-foot curler (38'), left-foot slide under keeper (43'). Counter-attack driven throughout.

EVENT LOG — DETAIL

#	TIME	CODE	ACTION	SCORE
1	38:00	OBI_P	Trapped a high ball out of the sky on the left wing under pressure	9.0
2	38:05	SOA	Turned control immediately into forward momentum down the flank	9.0
3	38:10	DRB	Executed a slick turn on the left wing to eliminate his primary defender	9.0
4	38:15	CAR	Charged down the left channel at high speed into the box	9.5
5	38:20	CRK	Beat a second defender inside the box with single-minded audacity	9.0
6	38:22	STK	Applied clean right-footed ball-striking technique on the sprint	9.5
7	38:25	FIN	GOAL 1 — right-foot finish into the back of the net ("pick of the lot")	9.5
8	43:00	OMS	Sparked a rapid counter-attack following a midfield turnover	9.5
9	43:10	OBI_P	Slipped in behind the Richmond backline to exploit open space	9.0
10	43:12	SOA	Processed the goalkeeper's movement instantly while sprinting onto the through-ball	9.5
11	43:14	STK	Struck cleanly with his weak (left) foot on the dead run	9.5
12	43:15	FIN	GOAL 2 — slotted the ball calmly under the keeper 1v1 to make it 5–0	9.5
13	44:00	MCS	Capped off a five-star first-half performance with a dominant brace	9.5
Mean Quality Score				9.31

CHART 4 · SINGLE-MATCH FGA PROFILE — RADAR (7 DISTINCT METRICS, 13 EVENTS)

How to read the shape. Seven axes for the seven distinct metrics scored across the two-goal brace.

What the shape says. This is a *saturated* heptagon. Every vertex sits between 9.0 and 9.5.

- **Peak (9.5):** STK, FIN, CAR, OMS, MCS. Two different finish types (right and left), a progressive carry, a counter-attack spark, and mental composure.
- **High (9.25):** SOA. Keeper processing in milliseconds.
- **Base (9.0):** DRB, CRK, OBI_P. Agility, audacity, positioning.

Caveat. This radar describes one first-half performance. A full-season average would produce a different, less saturated shape — the DRB and CRK metrics would likely pull down toward 7.0–7.5 based on the two-footed execution variance seen across the season.

4 · FGA RATING — PROVISIONAL

FGA — PROVISIONAL RANGE

7.0 – 7.8

⚡ Very Good · not finalised

TIER 3 — SINGLE MATCH

9.31

Peak, not baseline

TIER 1 — CAREER

6.90

Verified · 2 USL seasons

TIER	WEIGHT	STATUS	SCORE
Tier 3 — Scout Intelligence	50%	⚠ SINGLE MATCH, 13 EVENTS	9.31 (peak)
Tier 2 — Composite Intelligence	30%	✗ NOT COMPUTABLE	—
Tier 1 — Statistical Foundation	20%	✅ VERIFIED	6.90

LOG context: USL League One sits at approximately **LOG 2.0** in the FGA framework — the lowest tier in the series. His 2025 season was at USL Championship (LOG 2.8). Any absolute rating must be read against that context.

Classification band: ⚡ **VERY GOOD — mid-band.** The single-match ceiling demonstrates a player who can produce at a dominant level against a bottom-third opponent. The career baseline demonstrates a player who produces at a good-not-elite level week-to-week at the USL tier. The gap between the two is the honest question this report asks.

The positional identity issue. In the last 5 matches, Jimenez has played **LB (twice), AM, LW and LM**. That is five different roles in five matches. The stated position of "LW / W" does not match the deployment pattern. This is either:

(a) a utility player being asked to cover multiple positions because Westchester lacks depth, in which case the winger profile is a secondary role for a squad player, or

(b) a player whose primary role is unclear and whose versatility may be a symptom of the club not knowing where he fits. Either way, this must be resolved before the pairing set is finalised.

5 · TACTICAL DNA PAIRING

The archetype. Jimenez is a **two-footed left-sided forward** whose game is built on **counter-attack transition, progressive carrying, and 1v1 decoupling**. The elite metrics from the brace all describe a player who attacks space at speed and finishes with either foot.

Hwang Hee-chan	77%
Nicolás González	75%
Sadio Mané	72%
Kingsley Coman	70%

PRIMARY — HWANG HEE-CHAN · 77%

The closest overall match. Hwang is a **two-footed left-sided forward** whose game is built on counter-attack transition, aggressive pressing, and versatile deployment across LW, ST and even wing-back — the same profile Jimenez showed in the last 5 matches.

FGA COMPONENT	JIMENEZ	HWANG	ALIGNMENT
Position	LW / W	LW / ST	89%
Two-footed finishing	Right (38') + Left (43')	Genuinely two-footed	91%
Counter-attack focus	OMS 9.5	Definitional	93%
Progressive carrying	CAR 9.5	Strong	88%
1v1 agility	DRB 9.0 / SOA 9.25	Good — not the primary mechanism	76%
Defensive contribution	26 int / 23 tackles	High-pressing	85%
Positional versatility	LB / AM / LW / LM	LW / ST / WB	83%
Career level	USL League One	Bundesliga / Premier League	42%

Why 77%: Hwang is the closest modern archetype for a two-footed left-sided forward whose value is built on transition running and versatile deployment across the front line. Both players have been used in multiple roles; both are two-footed finishers. **Why not higher:** Hwang is at Premier League level. Jimenez is at USL League One.

SECONDARY — NICOLÁS GONZÁLEZ · 75%

The positional/technical comparison. González is a left-sided forward who plays both wings and central striker roles for Argentina and Juventus — same versatility, same two-footed finishing.

FGA COMPONENT	JIMENEZ	N. GONZÁLEZ	ALIGNMENT
Position	LW / W	LW / RW / ST	88%
Two-footed	Yes	Yes	91%
Counter-attack	Definitional	Strong	86%
Progressive carrying	CAR 9.5	Strong	84%
Physical profile	Undersized for position	Physical, robust	62%
Career level	USL League One	Serie A / Bundesliga	48%

TERTIARY — SADIO MANÉ · 72%

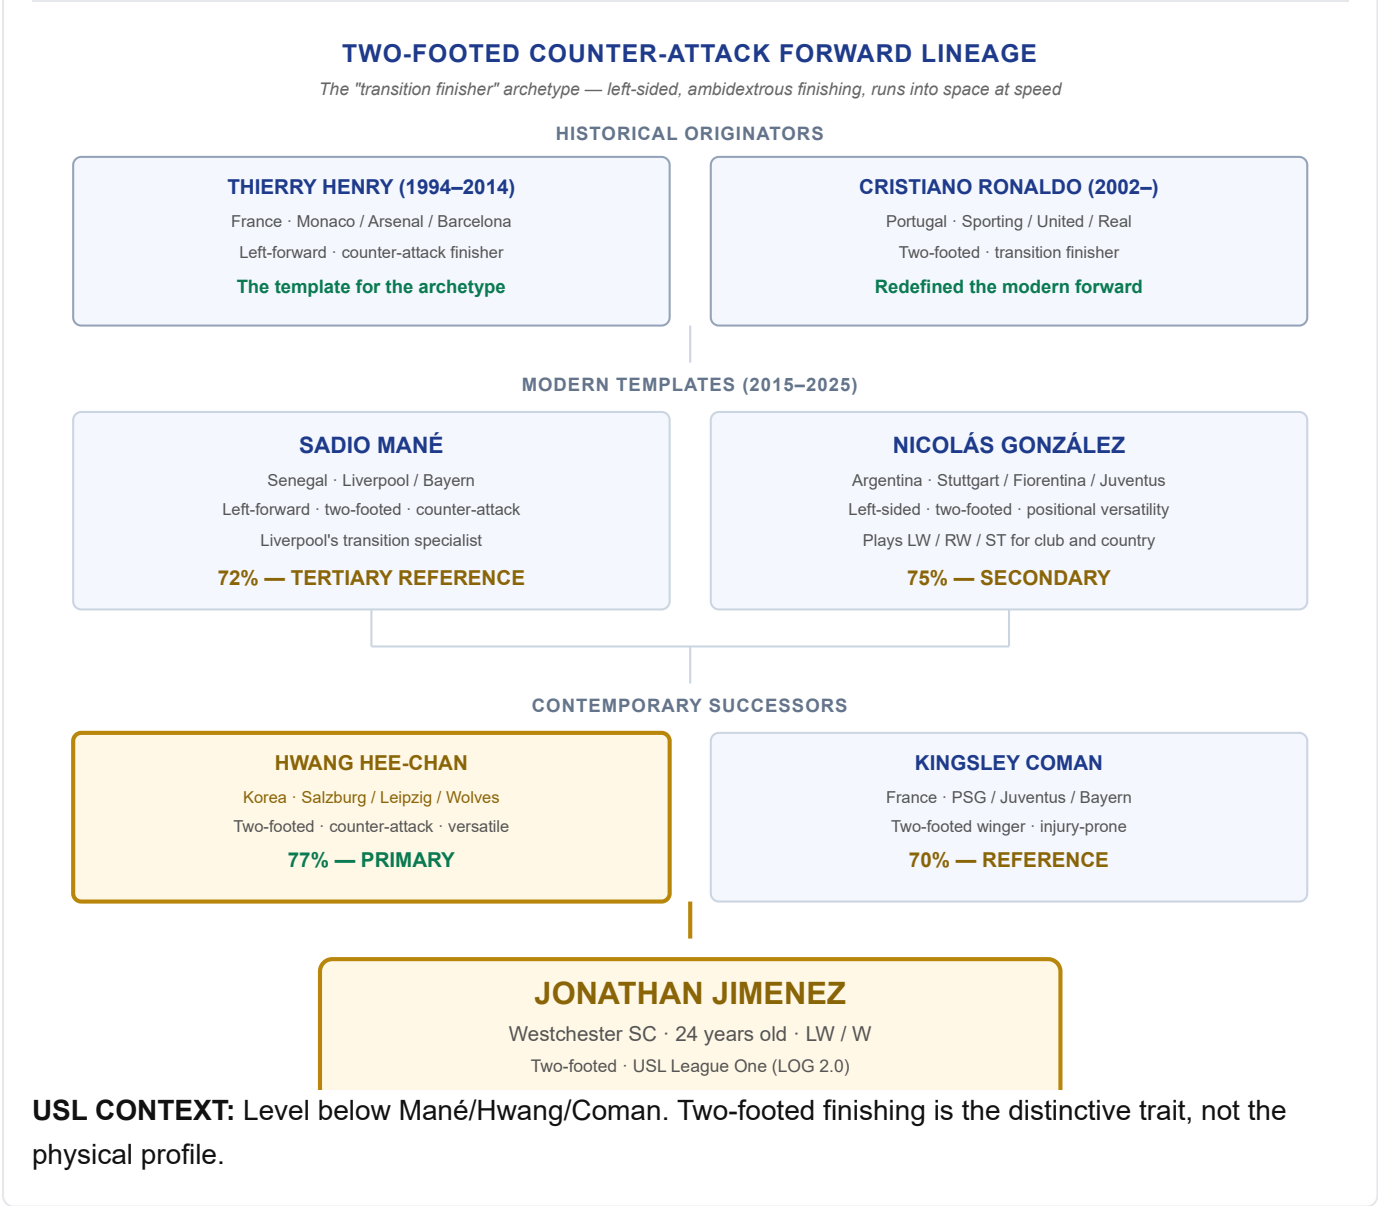

The counter-attack reference. Mané’s peak at Liverpool was built on the exact mechanism Jimenez showed against Richmond — rapid transition, two-footed finishing, aggressive counter-attacking. The physical gap is the material divergence.

REFERENCE — KINGSLEY COMAN · 70%

Two-footed winger with counter-attack instincts. More of a pure wide player than Jimenez has shown; less positional versatility.

6 · GENEALOGICAL TREE

CHART 5 · TWO-FOOTED COUNTER-ATTACK FORWARD LINEAGE

7 · WHAT THE PAIRING ACTUALLY TELLS YOU

The primary finding. Jimenez is a **two-footed left-sided forward** whose game is built on counter-attack transition, progressive carrying, and 1v1 decoupling. The **Hwang Hee-chan pairing at 77%** is the correct genealogical anchor because the mechanism — two-footed finishing, transition running, positional versatility — is the same.

The single-match log is the peak, not the baseline. The 13-event sequence from 38' to 44' produced a mean quality of **9.31** — the highest single-match average in the ESN file series. But it is one match. The Tier 1 data across two USL seasons shows a **0.38 G+A per 90** forward, not an elite international. Both are true.

The two-footedness is the distinctive technical trait. Right-footed curler at 38', left-footed slide under the keeper at 43', both in the same half. Very few wingers in the ESN file series can finish with both feet at that level. This is the specific skill that separates him from a dozen other USL left-wingers.

The positional identity is the unresolved question. Five roles in five matches (LB, AM, LW, LM) is either elite versatility or an identity crisis. A 24-year-old winger playing LB in a USL League One side is a warning sign — either he is being played out of position, or the club is not sure what he is. This must be resolved before any club commits.

The 2.5:1 foul ratio and 26 interceptions are the off-ball signals. Jimenez draws fouls at an elite rate and contributes defensively far more than a typical winger. This is unusual for a wide forward — it suggests either a defensive-minded system or a work-rate that exceeds the league average.

8 · VALIDATION STATUS & REQUIRED ACTIONS

REQUIREMENT	STATUS
Minimum 5 matches logged	✗ 1 MATCH
≥2 vs top-third opposition	✗ NOT APPLICABLE
≥1 away match	✗ NOT APPLICABLE
≥1 match while losing	✗ NOT APPLICABLE
Tier 3 video assessment	⚠ 13 EVENTS, SINGLE MATCH
Tier 1 verified	✓ 2 USL SEASONS + YOUTH
Position identity resolved	✗ 5 ROLES IN 5 MATCHES
COACH metric	✗ NOT SCORED
Second scout	✗ NOT ASSIGNED
FGA_v3_Final	✗ BLOCKED

REQUIRED BEFORE CLIENT DELIVERY

- 1. Log four more matches.** The single-match sequence is elite. The question is whether it is the ceiling or the baseline. Four more balance-checked matches would answer it.
- 2. Resolve the positional identity.** Five roles in five matches is either versatility or ambiguity. The pairing set cannot be finalised until the primary position is confirmed.
- 3. Score COACH.** Completely absent. 25% of the Lars framework.
- 4. Assign a second scout.** No pairing percentage should be finalised without blind cross-validation.

PUNCH LIST

#	ITEM	PRIORITY
1	Log 4 more matches (balance-checked)	HIGH
2	Resolve positional identity — five roles in five matches	HIGH
3	Score COACH metric	HIGH
4	Second scout for blind cross-validation	HIGH
5	Replace LinkedIn CDN logo with local or base64-embedded version	HIGH
6	Confirm exact height and weight	MEDIUM
