# The Empire FGA Verdict

**FGA Score: 7.2**

**The Explosive Wide Creator**

## Elite Upside (Confirmed)

A partially validated winger with elite, confirmed physical tools (top-end speed) and creative risk-taking.

## Pending Validation (Caution)

Weighed against genuinely unresolved mental metrics and physical limitations (175cm frame/aerial deficit).

# Elite Physical Tools and Off-Ball Limits

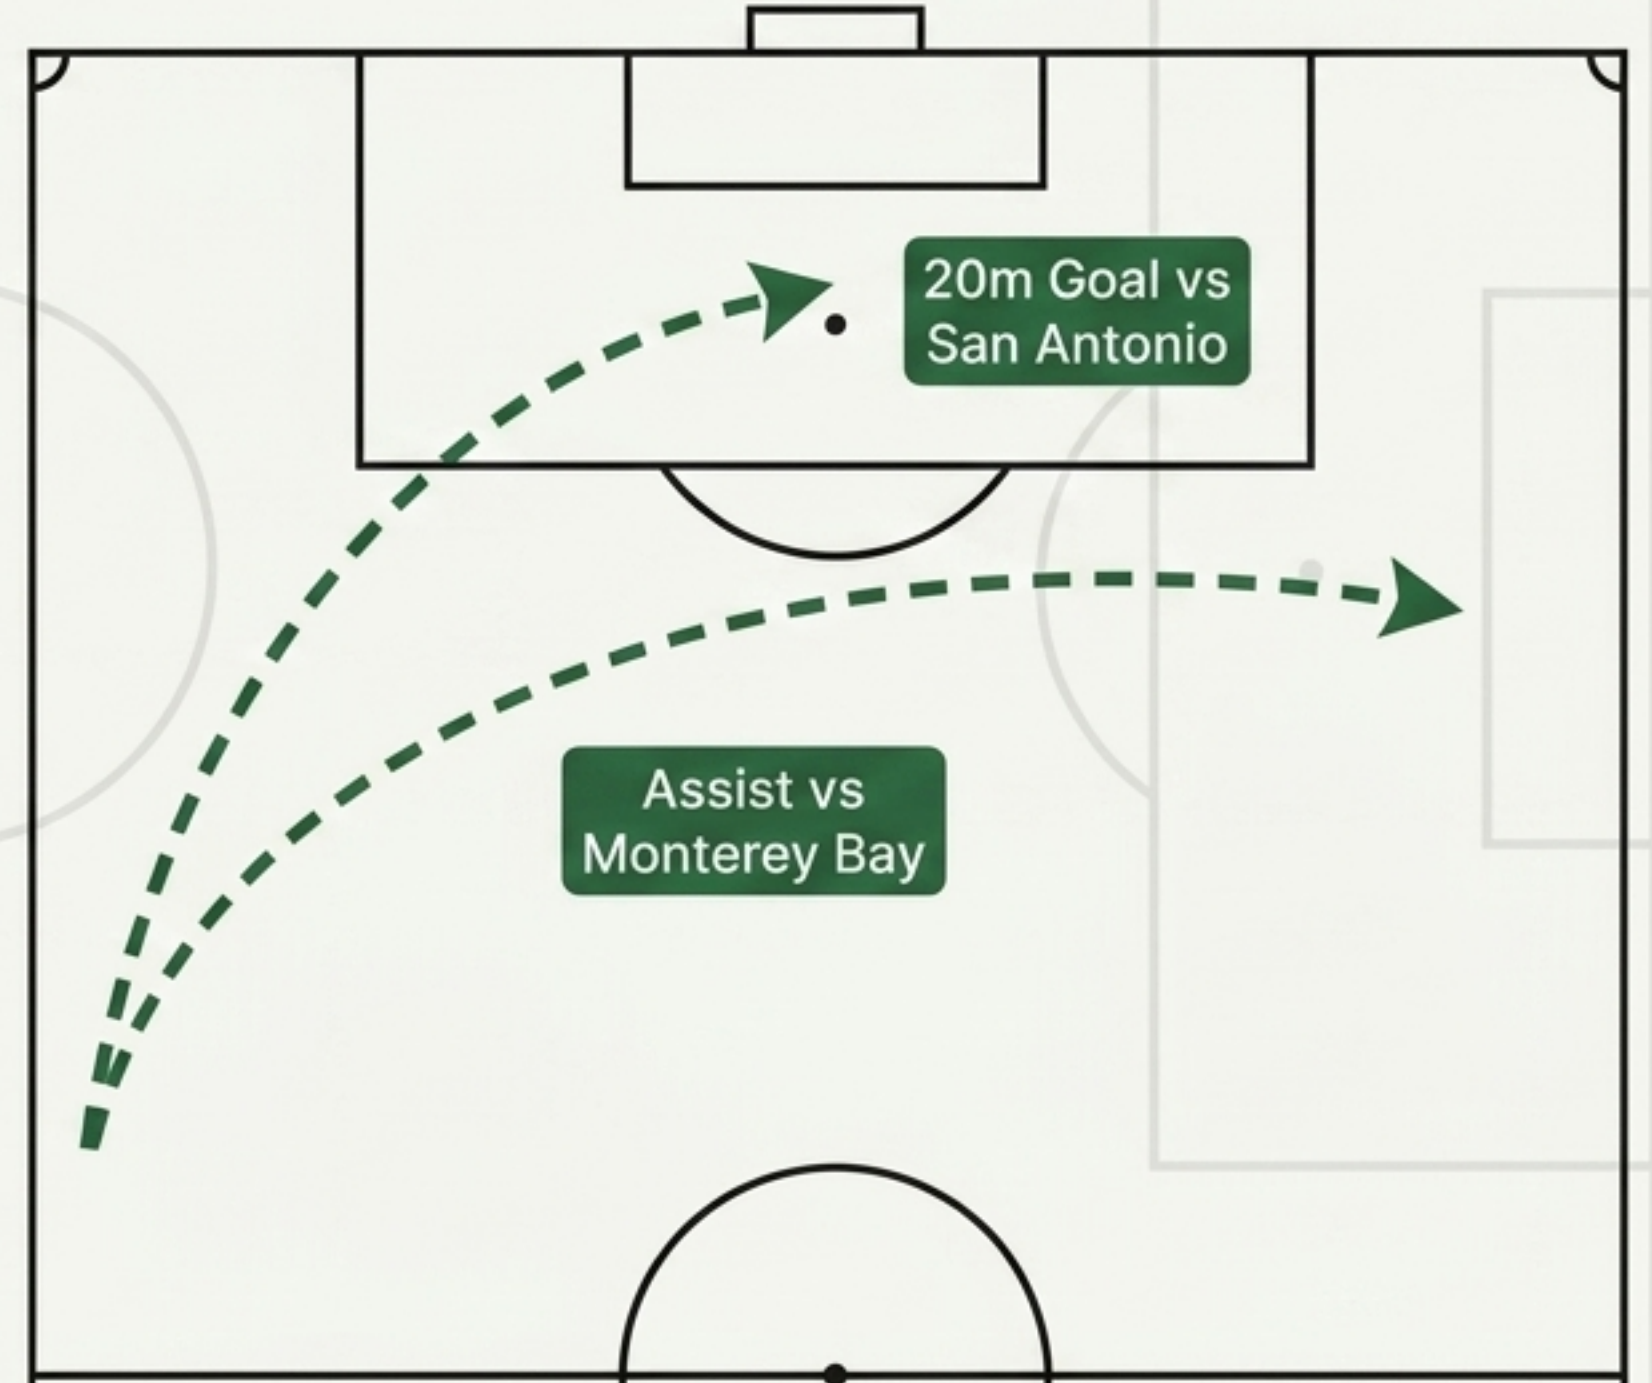

# The Creative Engine

Confirmed Metric:  
Creative Risk Taking (CRK: 9.3)

Supporting Output:  
17 Chances Created

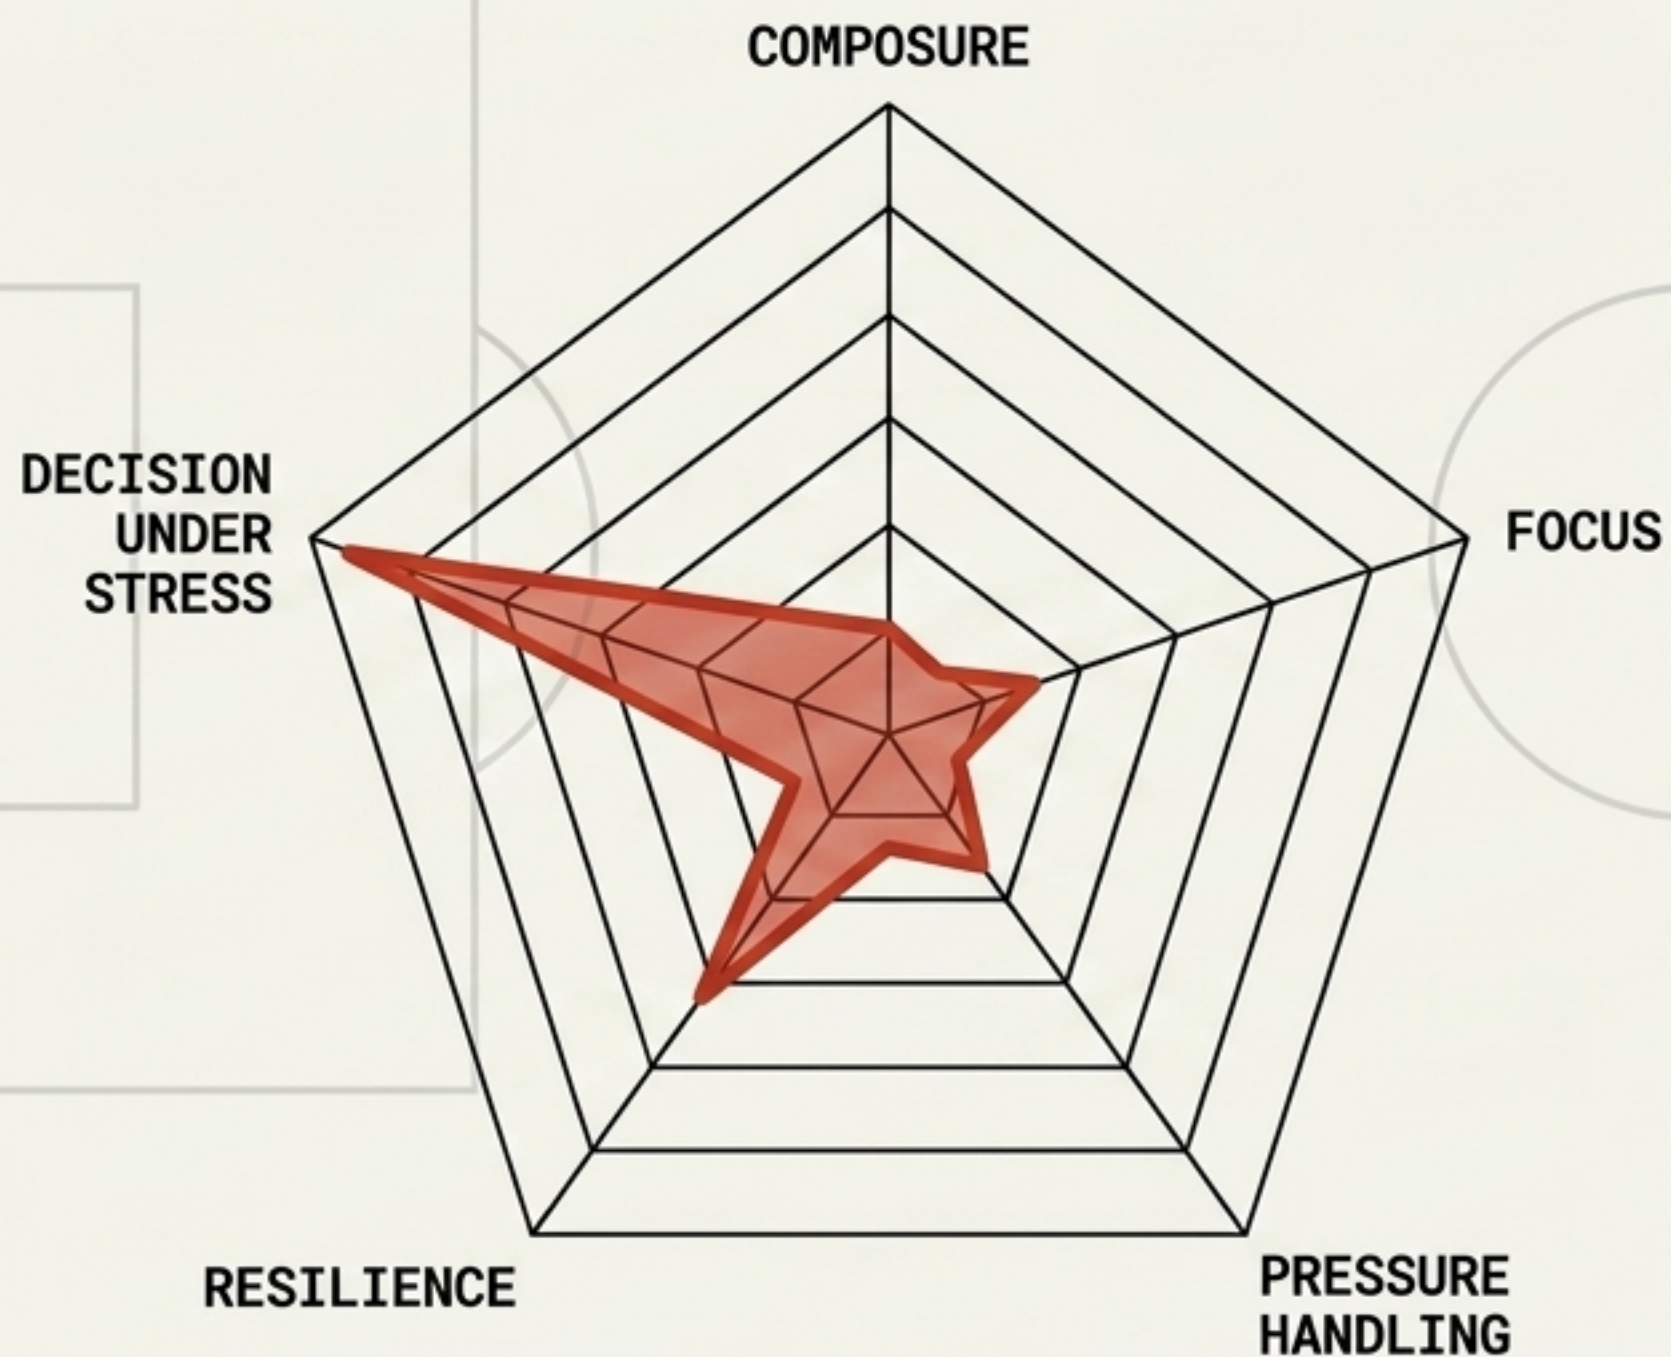

## Event Evidence

- Match 4 vs Monterey Bay (Q33): Eliminates Joel Garcia with a feint, adjusts cross to second post for Bennett's goal.
- Match 1 vs San Antonio (Q22): Receives at 25m, dribbles, scores from 20m.

# Mental Fragility and Tactical Open Questions

## Confirmed Red Flag: Mental Competence (MCS: 5.2)

"Worse than lose a physical or aerial duel, it's almost a humiliation, 3 times Ousman Jabang entirely walk all over him without foul him."

Event Evidence: Match 2 vs New Mexico (33'21)

## Missing Data Alert

Critical mental metrics including Character (CHR), Clutch Response (CRS), and Dynamism (DYN) remain entirely unconfirmed and lack sufficient event data.

# System Rigor Spotlight: The DYN Correction

## Previous Status

Dynamism (DYN): 1.0

## Corrected Status

Dynamism (DYN): 1.0

RULE TRIGGERED:  
1/3 Events Logged = PENDING

## The Reason for Reversion

Only 1 event logged: "After disappeared during 20 minutes on the pitch, he has finally the ball but he totally miss his control."

While a genuine pattern, the FGA protocol refuses to score it officially until 2 more events validate it.

# The Jekyll & Hyde Synthesis

Is the elite upside worth the undeniable risk?

## Elite Traits (The 10/10 Moments)

- Elite vertical threat (SII\_T: 10.0)
- Match-winning creative risks (CRK: 9.3)
- Devastating ghost runs drawing penalties

## Caution Signals (The 1/10 Moments)

- Disappearing for 20-minute stretches (DYN: 1.0 pending)
- Mental humiliation in defensive duels (MCS: 5.2)
- Severe aerial liability (30% win rate)

# Cross-League LOG Translation

**Translation Gap Context:** The numerical drop is driven primarily by the physical translation. His 175cm frame and poor aerial win rate limit his viability in higher, more physical leagues unless heavily protected tactically.

# Tactical Philosophy Fit

Cruyff Intelligence (7.8)

Bielsa Intensity (7.4)

Optimal Fit: Requires freedom, verticality, and systems that isolate him 1v1 on the flank.

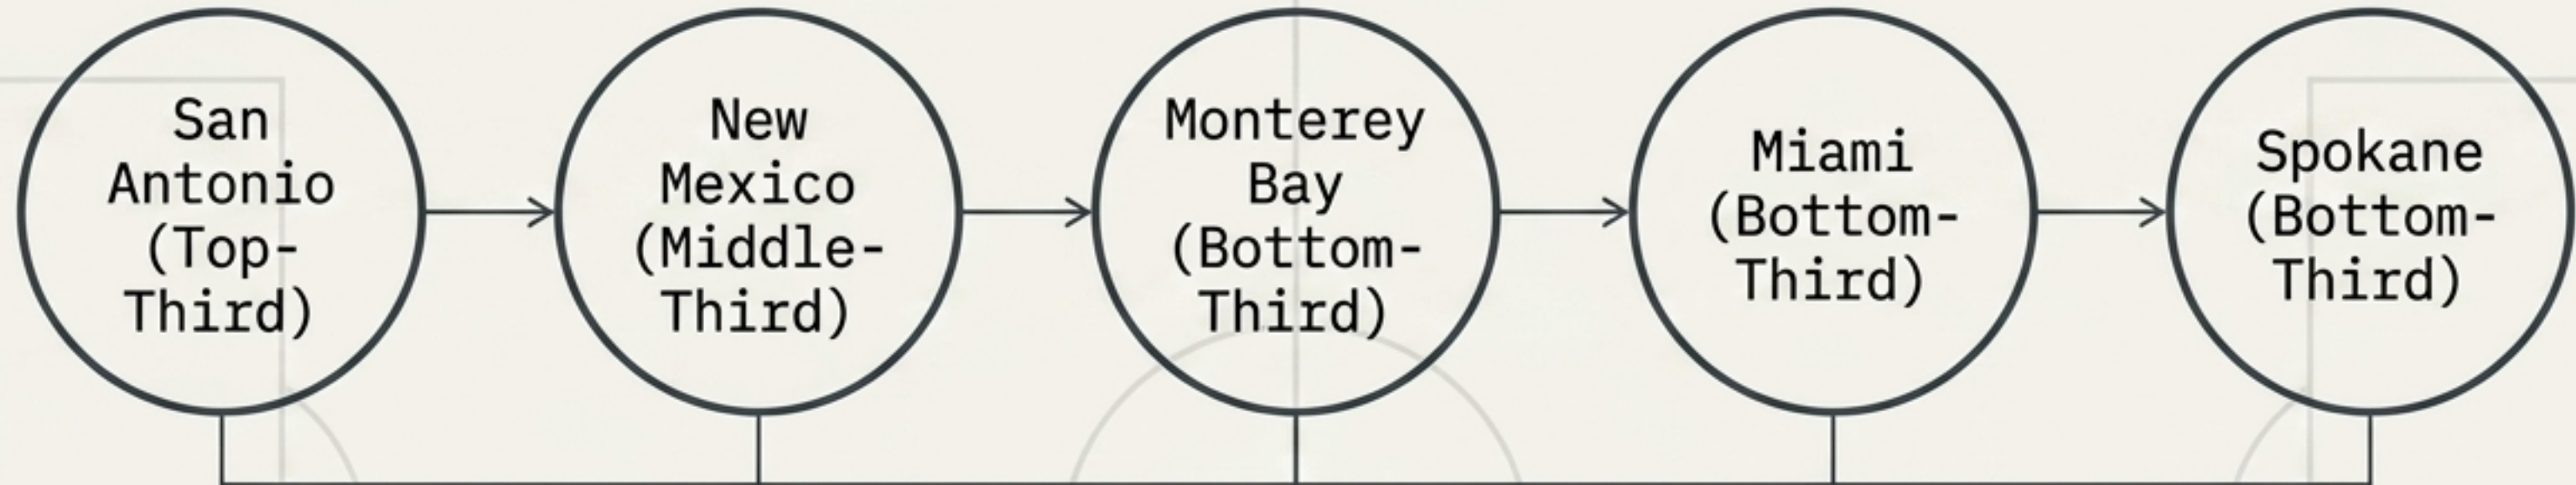

Simeone Cholismo (4.8)

Van Gaal System (5.5)

Worst Fit: Will fail in highly structured, rigid defensive block architectures demanding physicality.

# Match Register Integrity Protocol

6-Match Register:

## Balance Checks Passed:

1.  $\geq 2$  Top-third opposition matches included?
2.  $\geq 1$  Away match included?
3.  $\geq 1$  Losing state match included?
4. Minimum 5 matches reviewed? (6 logged)

# Strategic Deployment & Next Steps

## Scouting Directive

DO NOT finalize assessment. Commission Tier A analysts to score the 5 pending metrics (OBI\_T, SII\_R, CHR, CRS, DYN) to resolve the mental consistency questions before any acquisition.

## Tactical Directive

If acquired, deploy strictly as a wide attacker in transitional systems. He must be protected from direct physical and aerial duels to leverage his 9.4+ pace and 9.3 creativity.
